## Tool Name

GW1N4-A2B.exe

## Type

It's a command line software.
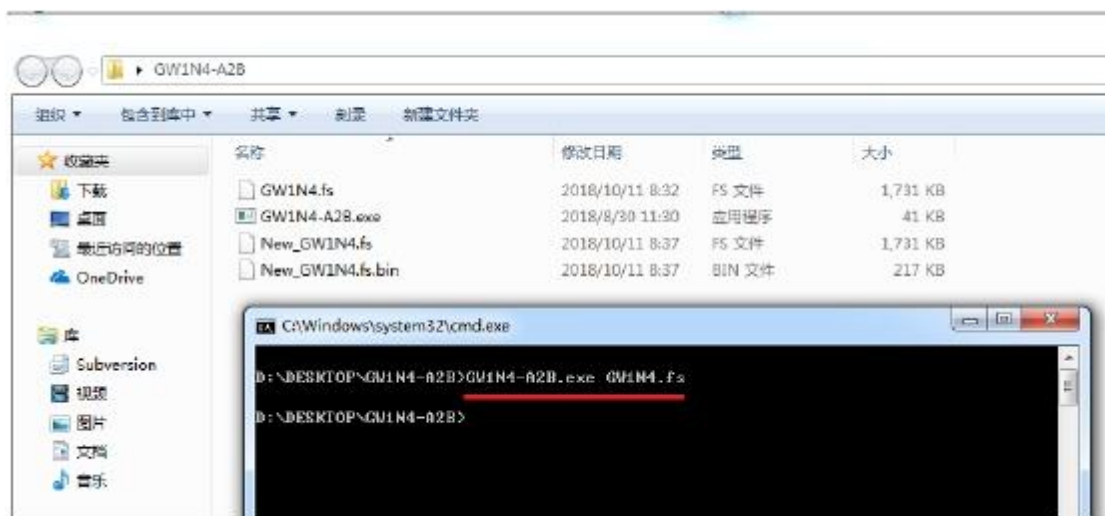

## Uasge

1. Put GW1N4.fs and GW1N4-A2B.exe in the same path. Enter the path at the command line.

2. Convert the file using the command below.

   **GW1N4-A2B.exe GW1N4.fs**

## Result

New*.fs and New*.bin are generated and stored in the current path. The .fs file is the datastream file with

ASCii format, same as the source file format. The .bin file is a binary format, as shown in the figure below.

## Notes

Encrypted or compressed datastream file conversion is not supported currently.
